PROFESSIONAL SUMMARY

A Computer Science and Engineering graduate with research interests in Artificial Intelligence, Deep Learning, Machine Learning, Medical Image Analysis and Explainable AI (XAI), with a particular interest in developing reliable and interpretable AI solutions for healthcare applications. During undergraduate studies, actively engaged in research involving deep learning-based medical image analysis and explainable AI, while developing a strong interest in machine learning for real-world applications. Also experienced in peer teaching and academic mentorship in core areas including Data Structures & Algorithms, OOP, C++, and Competitive Programming.

EDUCATION

B.Sc. in Computer Science and Engineering

2026

University of Barishal, Bangladesh

CGPA: 3.51 / 4.00

PUBLICATIONS

CSWFE: A Class-Specific Weighted Feature Engineering Framework for Mpox Skin Lesion Classification Using Explainable AI

(Undergraduate Thesis) — Accepted in 4th International Conference on Computing Advancements (ICCA 2026)

PROFESSIONAL EXPERIENCE

Lab Attendant — Data Science with Python & Web Development

Aug 2024 – May 2025

EDGE: BU-CSE Digital Skills Training

- Mentored 100+ students in hands-on programming sessions covering Data Science, Python, and Web Development.
- Delivered technical assistance; coordinated with instructors and participants to ensure effective learning sessions.
- Supported debugging, evaluation, and academic project supervision.

Research Assistant — Academic Research

Jan 2025 – Present

Dept. of Computer Science and Engineering, University of Barishal

Project: Mpox Skin Lesion Classification Using Explainable AI

- Conducted research on medical image analysis using Deep learning, Transfer Learning and Explainable AI (XAI) techniques for classification, model interpretation, benchmarking, and performance evaluation.

Supervisor: taislam@bu.ac.bd

SELECTED ACADEMIC PROJECTS

Chicken Fowlpox Detection System [GitHub Repository](#)

Flutter · Python · Machine Learning · Flask

- Developed a deep learning-based mobile app for Fowlpox detection using a Vision Transformer (ViT) model, achieving 95.06% test accuracy.
- Integrated a Flask API with a Flutter app for real-time image-based prediction.

QuickFix – Service Management App [GitHub Repository](#)

Flutter · Dart

- Developed a Flutter-based mobile application for booking home services such as cleaning, plumbing, and electrical assistance.

Enhanced Sports Search Engine [GitHub Repository](#)

Python · Web Crawling & Scraping · BeautifulSoup

- Built a sports search engine using Python web scraping to extract cricket and football player stats and career data.
- Deployed using ngrok with BeautifulSoup and Requests libraries.

TECHNICAL SKILLS

Programming C/C++, Python, Java, SQL, JavaScript, PHP

Machine Learning Supervised/Unsupervised Learning, Transfer Learning, CNN, RNN, Ensemble Methods, Clustering.

Explainable AI SHAP, Grad-CAM, t-SNE

PROGRAMMING CAREER

- Solved over **2000+** problems across various online judges.
- **Specialist** (Max rating: 1402) at [Codeforces](#); **3★** at [Codechef](#).
- Participated in onsite programming contests including **IUPC** and **NCPC**.

CERTIFICATIONS & VOLUNTEER LEADERSHIP

Mobile Application Development (Flutter) [Certificate Link](#)

Secretary-General, Programming Club, CSE Department

Jan 2024 – Dec 2024

Joint General Secretary, Badhon Blood Donation Organization, BU

Mar 2024 – Jan 2025
